GENERAL DOCUMENT FORMATTING RULES

- Page Size: A4
- Margins
  - Left: 1.5 inches
  - Top: 1 inch
  - Bottom: 1 inch
  - Right: 1 inch
- Font:
  - Body text: Times New Roman, 12pt
  - Heading 1 title: 16pt (Acknowledgement, Approval Page, List of Tables, List of Figures, Abstract, Abbreviation, Chapter, Chapter Names, Reference, Appendix, etc.)
  - Heading 2 title: 14pt
  - Heading 3 title: 12pt with Bold
  - Heading 4 title: 12pt with Italic
  - It is recommended to use only the first 3 headings for titles if it is not mandatory.
- Line Spacing: 1.5 (Body Text), 1.0 (Tables, Figures, Captions)
- Coloring: Use only **black color** for texts for high-quality printing
- Capitalize each word for headings except conjunctions.
- Chapters must start from new page.
- Alignment: Justified (Body Text), Centered (Heading 1), Left aligned for sub-titles
- Page Numbers: Bottom center, starting from Approval Page (Roman numerals) and Introduction (Arabic)
- File Format: Hardcopy with PDF softcopy file
- File Naming: FirstName_LastName_ID_InternshipReport_Year.pdf
- Referencing Style: APA 7th Edition

AUTHENTICITY VALIDATION REQUIREMENTS

To ensure the integrity of the internship program and the student's learning experience, your report must include comprehensive evidence verifying the authenticity of your internship experience. Reports submitted without sufficient validation will be subject to rejection. You are required to compile and include the following mandatory evidence within the appendices of your report.

Mandatory Evidences (To be included in Appendices)

1. Photographic Proof

You must provide a minimum of five verifiable photographs. These images should serve as clear documentation of your physical presence and active participation within the professional environment. Required scenes include you at your designated workstation, the company's main entrance or building with its logo clearly visible, team meetings or collaborative sessions in progress, tangible outputs of your work such as computer screens, prototypes, or documents, and a final presentation or project handover session. All photos must include metadata timestamps to confirm they were taken during the internship period.

2. Supervisor Verification

For the report to be evaluated by the reviewer, it is mandatory to include the validated internship report documentation, evaluated, signed, and stamped by your company supervisor. Additionally, a minimum of two (for Information Technology and Computer Science students) or four (for Software Engineering students) monthly attendance, a signed, stamped, and packed supervisor assessment result assessing your progress and performance, and an evaluation result by an assigned mentor from Mekdela Amba University staff member. The document will be checked by the reviewer, and other evaluation results will be checked by the department.

3. Digital Traces

Screenshots of digital footprints are required to corroborate your ongoing engagement. This evidence should include email correspondence threads with your supervisor or colleagues discussing tasks and progress, commit history from the company's internal repository if your work was software-related, and calendar entries showing scheduled meetings and project milestones**.**

4. Work Samples

You must include actual deliverables produced during your internship. These samples, which demonstrate the application of your skills, can encompass code snippets (for software-related roles), analytical reports or dashboards created, design files or technical documentation, and the presentation slides used for any official meetings.

AI-GENERATED CONTENT PROHIBITION

Contents within the internship report must be original and based solely on your experience. The use of generative AI tools (such as ChatGPT, DeepSeek, Gemini etc) for drafting or generating report content (such as images and diagrams) is strictly prohibited and constitutes academic misconduct. The submission will be examined, and the detection of AI-generated content will result in automatic failure.

REPORT STRUCTURE

I. COVER PAGE

Use Appendix 1 as a template for this.

II. APPROVAL SHEET / DECLARATION

This section contains the formal declarations and approvals necessary to authenticate the report. Student Declaration, where you must handwrite your signature and date, to affirm that the report is your original work based on your actual internship experience and that you have not used AI tools. Advisor Approval, featuring the signatures and dates of your academic advisor and department head. Company Supervisor Authorization, which must include the signature of your internship supervisor, the date, and the official company stamp, to provide external validation of your performance. Use Appendix 2 as a template for this.

III. ABSTRACT

Write a concise 150-250 words abstract introducing the hosting company, including its background and industry. Summarize the main project you undertook, outlining its significance and objectives. Mention key methodologies used in your work, highlighting specific tools or techniques. Discuss the major outcomes achieved and their impact on the company or your learning experience. Conclude with a brief personal reflection on the skills gained during the internship. Ensure the abstract is a single paragraph without indentation, citations, or references, and include 3-5 relevant keywords at the end.

Keywords: _____, _____, _____, _____

IV. TABLE OF CONTENTS

Use Microsoft Word's automatic feature to generate your table of contents. Include all headings up to the third level, along with lists of figures and tables. Ensure all page numbers are accurate and reflective of the content. Update the Table of Contents after making any changes to your document.

V. LIST OF FIGURES & TABLES

Each presented on separate pages, these lists are mandatory for organizing your visual and tabular data. Every figure and table within the report must be sequentially numbered according to its chapter (e.g., Figure 3.1, Table 4.2) and must have a descriptive title. The lists must provide the correct page reference for each item, allowing evaluators to locate them easily.

CHAPTER 1: INTRODUCTION (2-3 pages)

1.1. Background

This section establishes the foundational context for your internship report. Begin by discussing the critical role and importance of the internship within your academic program, explaining how it serves as a bridge between theoretical learning and professional practice. Follow this with a brief introduction to your specific field of study, outlining its core principles and contemporary relevance, which sets the stage for understanding the nature of the work you undertook.

1.2. Purpose and Objectives of Internship

In this paragraph, articulate the specific aims of your internship. Start by listing 3-5 concrete learning objectives you set out to achieve, ensuring they are specific and relevant to your career aspirations. Then, explain in detail how this practical experience complements and enhances your academic coursework, providing real-world application for theoretical concepts. Conclude by describing your selection of the host company, detailing the reasons behind your choice (such as its industry reputation, alignment with your interests, or unique learning opportunities), and summarizing the research you conducted about the company before your application.

1.3. Duration and Location

This section provides the logistical framework of your internship. Clearly state the exact start and end dates, along with the total number of hours completed. Specify the physical address of your workplace and describe the work mode, whether it was conducted fully onsite, remotely, or in a hybrid arrangement, as this context is crucial for understanding your daily experience and engagement with the team.

1.4. Document Organization

This final part of the introduction offers the reader a roadmap for the report. Provide a brief overview of each subsequent chapter, summarizing what will be covered in the Company Background, Project Execution, Internship Experience, Benefits Gained, and Conclusion.

CHAPTER 2: COMPANY BACKGROUND (4-5 pages)

1.1. Company History

Detail the origins and evolution of your host organization. Include the year of its establishment, the founders, and key historical milestones that have shaped its growth. Furthermore, discuss the company's stated mission, vision, and core values, explaining how these principles guide its operations and strategic direction.

1.2. Products/Services

Provide a comprehensive description of the company's main offerings. Go beyond a simple list to explain the nature, purpose, and value of its primary products or services. Additionally, analyze the company's market position and identify its main competitors, offering insight into the industry landscape in which it operates.

1.3. Organizational Structure

Present a clear understanding of the company's hierarchy. You must include an original organizational chart (created by you, not copied directly from a website) that maps out the major departments and reporting lines. Clearly highlight and label the specific department where you were placed, showing your position within the broader organizational framework.

1.4. Workflows and Processes

Describe how the company conducts its core business. This should include a diagram of the main business processes relevant to your department or project, followed by a written description of the daily operations. Explain the workflow from initiation to completion for key tasks, illustrating the environment in which you were integrated.

1.5. Company Culture

Reflect on the intangible aspects of the workplace. Describe the overall work environment, including the office atmosphere, management style, and general ethos. Discuss the team dynamics you observed and participated in, commenting on collaboration, communication styles, and the social fabric of your department. Validation Requirement: Include a photograph of the company premises and your original organizational chart with your department.

CHAPTER 3: PROJECT SELECTION AND EXECUTION (5-7 pages)

3.1. Project Title and Description

Begin by stating the official title of the project as assigned to you by the company. Then, provide a detailed description of the project, outlining its scope, purpose, and how it fits into the company's broader goals. This sets a clear foundation for the subsequent analysis.

3.2. Problem Statement

Articulate the core issue that your project aimed to resolve. Write a clear, concise statement of the problem, followed by an explanation of why this problem was significant to the company's operations, efficiency, or strategic objectives, establishing the project's relevance and necessity.

3.3. Objectives

3.3.1. General Objective

Define what the project sought to accomplish. State the general, overarching objective with not more than 2 lines.

3.3.2. Specific Objectives

Break the general objective down into 3-5 specific objectives. These specific objectives should be SMART (Specific, Measurable, Achievable, Relevant, Time-bound) to clearly indicate the intended outcomes.

3.4. Methodology

Detail the approach taken to execute the project. Describe the step-by-step methodology, including phases of planning, development, testing, and implementation. List all tools, technologies, and techniques applied during each phase. Furthermore, present a timeline that outlines key milestones and deadlines, demonstrating project management and planning.

3.5. Literature/Industry Review

Situate your project within a broader context. Discuss how similar problems are addressed in the industry, referencing current trends, standard solutions, or technological advancements. Summarize best practices in your field related to the project's focus, showing your research and understanding of professional standards. Validation Requirement: Screenshots of project planning tools (e.g., Trello, Jira, MS Project) or photographs of handwritten planning notes must be included.

CHAPTER 4: INTERNSHIP EXPERIENCE AND SPECIFIC WORK (10-12 pages)

4.1. Department and Role

Describe the department you were assigned to, including its primary function and how it interacts with other units. State your official position or intern title, and explain the rationale provided for your placement in that specific role and department.

4.2. Daily Responsibilities

Outline the routine of your internship. Describe a typical daily schedule, which may include a time log, and list your regular tasks and ongoing duties. This illustrates the day-to-day reality of your role beyond major projects.

4.3. Major Tasks/Projects Completed

Catalog your significant contributions. Provide a chronological list of all major tasks and projects with their dates. Select the most important projects and provide a detailed

description for each, covering your specific role, actions taken, and the context of the work.

4.4. Tools and Technologies Used

Inventory the practical skills you applied. List the software applications you learned or mastered, any specific hardware you operated, and the technical skills you developed or enhanced through their use during your tasks and projects.

4.5. Challenges Faced

Reflect on the difficulties encountered. Describe a minimum of three specific challenges, providing concrete examples. For each, explain how the challenge manifested and the impact it had on your workflow, timeline, or output.

4.6. Solutions Implemented

Demonstrate your problem-solving ability. For each challenge outlined in the previous section, detail the step-by-step solution you designed and implemented. Conclude by describing the outcome of each solution, highlighting what was learned or achieved.

4.7. Results and Achievements

Quantify and qualify your contributions. Present quantifiable results where possible (e.g., “increased data accuracy by 15%”). List all key deliverables you produced and summarize any formal or informal feedback received from your supervisor or colleagues regarding your work and its outcomes.

CHAPTER 5: BENEFITS GAINED (4-6 pages)

5.1. Technical Skills Enhancement

Detail the improvement in your hard skills. List specific technical skills you improved, describing your competency level before and after the internship. Also, mention any formal certifications or badges you earned during this period.

5.2. Theoretical Knowledge Application

Bridge classroom learning with practice. Identify specific concepts, theories, or models from your academic courses that you applied during your internship. Discuss any gaps you identified between theoretical knowledge and its practical application in a real-world business setting.

5.3. Problem-Solving Capability

Illustrate your analytical growth. Describe real, non-trivial problems you solved, outlining the specific methodology you employed (e.g., root cause analysis, design thinking). Explain your decision-making process, including how you weighed options and arrived at a solution.

5.4. Professional Skills Development

Highlight the growth of your soft skills. Provide examples of how your communication skills (written, verbal, and presentation) improved. Discuss time management and organization techniques you learned and applied to meet deadlines and manage multiple responsibilities.

5.5. Teamwork and Collaboration

Reflect on your interpersonal dynamics. Describe specific team projects you participated in, detailing your role within the group. Share any experiences with conflict resolution or navigating different working styles to achieve a common goal.

5.6. Leadership Experience

Discuss any leadership or mentorship moments. Note opportunities where you took initiative or led a task, however small. Also, describe mentorship you received from colleagues or, conversely, mentorship you provided to others.

5.7. Work Ethics and Professionalism

Articulate your understanding of workplace norms. Discuss the company's formal code of conduct and the informal professional standards you observed and adopted. Reflect on any ethical considerations or dilemmas you encountered and how they were navigated. Validation Requirement: Include scanned copies of any training certificates, award badges, or formal recognition received during the internship.

CHAPTER 6: CONCLUSION AND RECOMMENDATIONS (2-3 pages)

6.1. Overall Conclusion

Synthesize the entire internship experience. Provide a summary that ties together the company, your project, and your key activities. Assess the degree to which you achieved the initial objectives stated in Chapter 1 and offer a personal assessment of your growth over the internship period.

6.2. Recommendations for the Company

Offer constructive insights based on your firsthand experience. Provide practical, actionable suggestions for the company, stemming from your observations of processes, tools, or workflows. Identify potential improvements that could enhance efficiency, morale, or output in your department or the broader organization. This chapter must be supported by photos of you performing tasks, screenshots of work outputs, signed task completion forms, and email threads discussing progress.

Present focused, forward-looking advice. Offer actionable recommendations for the host company. For each recommendation, briefly discuss its potential impact or benefit to the department or company.

6.3. Recommendations for the University

Provide feedback to your academic institution (Mekdela Amba University). Suggest specific ways the university's internship program could be improved for future students. Additionally, offer ideas for curriculum improvements that would better prepare students for the practical challenges you faced.

6.4. Personal Future Plans

Connect the experience to your career trajectory. Explain how the internship has influenced or solidified your career goals. Outline the specific skills you plan to develop further based on the gaps or interests identified during your internship.

6.5. Final Reflection

Share a key personal takeaway. State the single most valuable lesson you learned from the experience. Conclude by offering a piece of practical advice for future interns embarking on a similar journey.

REFERENCES

All sources cited within the report must be compiled here using the APA 7th Edition formatting style. This includes references to company documents, websites, academic literature, industry reports, and any other resources you consulted. A minimum of 10 credible sources is required to demonstrate thorough research and contextual understanding.

APPENDICES

This section contains all the supporting evidence and validation documents referenced throughout the report. It is organized into sub-sections for clarity: Verification Documents (acceptance letter, ID card), Work Evidence Portfolio (photos, work samples, code), Communication Logs (emails, meeting minutes), Assessment Forms (evaluations), and Additional Evidence (certificates, manuals). There is no page limit for the appendices.
